

MATRIX⁺

The most energy-efficient membrane in the industry

Patented PTFE technology

Reduced energy consumption

High-temperature resistance

Twenty years of testing

High performance

Reduced organic/inorganic fouling

***Save energy,
save money.***

The only membrane in the industry with embedded PTFE

EDI engineered solutions are the result of over 40 years experience in the water and wastewater treatment industry. By applying our advanced technology principles of aeration and biological treatment to challenges facing their customers, EDI has earned the reputation of being an innovator and industry leader.

EDI provides municipal and industrial treatment solutions in over 100 countries, has 7,000+ installations, and treats the wastewater needs for more than 400 million people.

Visit www.EnvironmentalDynamics.com to discover the savings you can have with Matrix Plus.
